

```

function course_exam(c_param, e_param, co_param)
{
    var url = '<?php echo base_url() ?>';
    var section = '<?php echo $section ?>';

    fetch("Examination_Portal/course_exam", {
        method: "POST",
        headers: {
            "Content-Type": "application/x-www-form-urlencoded"
        }, body: new URLSearchParams({
            e_param: e_param,
            c_param: c_param,
            co_param: co_param,
            sec_param: section
        })
    }) .then(response => response.text())
    .then(result => {
        console.log(result);
        if (result == 1) {
            url = url + 'Examination_Portal';
            window.open(url, '_blank');
        } else {
            alert(result);
        }
    })
    .catch(error => {
        console.error("Error:", error);
        alert("Something went wrong.");
    });
}

```
